Work Experience

Data Engineer Jul 2025 - Jan 2026

Boviet Solar Technologies *Greenville, NC, USA*

- Engineered 15+ **ETL pipelines** integrating SAP, Oracle and Microsoft Fabric data into Power BI for real-time reporting used by 1,000+ employees
- Built a two-tier scalable pipeline with Azure **Data Lake** as the raw landing zone and **Snowflake** as the serving layer, moving daily loads from full reloads to incremental change tracking across 5 sources to cut refresh time 60%
- Developed 20 **Power BI** dashboards with optimized **SQL** data models across 7 internal departments, improving query performance 4.5x and cutting stakeholder reporting turnaround by **80%**
- Automated end-to-end SAP data extraction with **Python RPA** (Playwright, PyAutoGUI), saving 10+ hrs/week for finance team
- Designed a real-time CDC pipeline (Debezium, Kafka, Docker) replicating on-prem **Oracle** changes to a **PostgreSQL/Azure cloud** replica in under 4s, isolating BI and analytic workloads from production and protecting source-system performance

Data Analyst Mar 2023 - Apr 2024

Align Associate *Chennai, TN, India*

- Analyzed 20M+ event/operational records (**AWS S3, SQL, Python**); built dbt star-schema models cutting query latency 35% and shortened sprint delivery by 3 weeks
- Enhanced 6 production **Spark** ETL jobs on **Databricks** with modular SQL (CTEs, window functions), boosting ETL pipeline data accuracy 80%
- Automated data-quality checks for nulls, referential integrity and SLA monitoring across large datasets, pushing data extraction accuracy by 2x
- Deployed scalable Power BI semantic models with 12+ **KPIs** and complex **DAX** measures, empowering stakeholders to self-serve ad-hoc analytics
- Partnered with cross-functional stakeholders across 3 Agile teams, standardizing **CI/CD** pipelines in **Azure DevOps** to improve release consistency

Projects

Event-Driven Analytics Pipeline for KPI & Risk Insights | *Power BI, Alteryx, Snowflake, Azure Data Factory, Databricks*

- Cleaned & explored 500K+ records across 3 fact and 7 dimension tables in **Alteryx** using SQL quality checks to validate data integrity before analysis
- Modeled a 3-tier Snowflake data warehouse orchestrated with Azure Data Factory and Databricks (**PySpark**), cutting query time 55%
- Produced 10 **Power BI** dashboards with 25+ reusable DAX measures for tracking KPI trends and risk exposure across departments

Automated Multi-Stage Data Pipeline Platform | *Python, Apache Airflow, Snowflake, AWS, Docker, Pandas*

- Replaced manual data ingestion with Airflow ELT pipelines that auto-extract, validate and loads 1.2M+ records into Snowflake via **AWS S3**
- Delivered **sub-2-second** query response times across 10K+ company filings by architecting a decoupled dual-microservice FastAPI system separating data warehouse query execution from **Airflow DAG** orchestration
- Reduced insights time for stakeholders by deploying a self-serve **Streamlit** analytics platform on cloud backed by a **Dockerized** 3-stage ETL pipeline

Enterprise Big Data BI Platform for Content & Performance Analytics | *Tableau, Snowflake, Hadoop, Alteryx, KPI, Azure Data Factory*

- Improved dashboard load times by 35%, orchestrating end-to-end data ingestion using Alteryx, **Hadoop** and ADF on an ER-modeled schema
- Decreased query execution time from 45s to 12s by modeling 70M+ records into an optimized star-schema architecture across 7+ ADF pipelines
- Enabled KPI tracking across content performance and audience segmentation by building 11+ **Tableau** dashboards on live Snowflake sources

SolarQuery AI: Conversational BI Bot | *AI, Anthropic API, Python, Claude Code, FastAPI, Oracle, Azure, Redis, SQLite*

- Architected a chatbot that turns plain-English questions into **SQL** queries and runs them against Oracle and Azure Data Lake, so analyst and stakeholder teams can pull numbers without writing queries
- Ran it on a local **Ollama** model with **FastAPI** and **Redis** caching, with multi-layer prompt-injection guardrails that keep output read-only

Skills & Certifications

Programming: SQL (PostgreSQL, Oracle, PL/SQL, SQL Server), Python (pandas, NumPy, scikit-learn, Matplotlib), R

BI & Analytics: Power BI (DAX, Power Query, Data Modeling), Tableau, Looker, Power Apps, Excel (VLOOKUP, Pivot Tables)

ETL & Data Engineering: Azure Data Factory, Databricks, Alteryx, Apache Spark, Kafka, dbt, Airflow, Docker, SAP HANA

Cloud & Warehousing: Snowflake, Azure (Data Lake, Synapse, DevOps), AWS (Redshift, S3), GCP (BigQuery, Big Data), FastAPI

AI Tools & Methods: RAG and LLM APIs (LangChain), A/B Testing, Predictive & Dimensional Modeling, Data Visualization, GitHub

Certifications: Claude 101, Microsoft Fabric Data Engineer Associate, Oracle OCI Generative AI Professional 2025, Google Cloud Program 2021

Education

Northeastern University | Boston, MA, USA | *Master of Science in Information Systems* **Sep 2024 - Aug 2026**

Courses: Database Management, Business Intelligence and Analysis, Data Governance, Agile Software Development **GPA: 3.95**

Vellore Institute of Technology | India | *Bachelor of Technology in Computer Science & Engineering with AI and Robotics* **Sep 2020 - Jul 2024**

Courses: Data Structures & Algorithms, Data Visualization, Exploratory Data Analysis & Warehousing, AI/ML, Operating Systems **GPA: 3.7**
